

CLASS TITLE: SENIOR INDUSTRIAL HYGIENIST

Class Code: 02755400

Pay Grade: 30A

EO: C

CLASS DEFINITION:

GENERAL STATEMENT OF DUTIES: To supervise the work of a staff engaged in an industrial hygiene program relating to the identification and evaluation of hazardous exposures to chemical and physical agents, recommendations for and review of hazard control programs and systems, and review of and participation in related training activities; to perform the more complex activities of said program; and to do related work as required.

SUPERVISION RECEIVED: Receives general instructions from a superior as to policies and objectives with wide latitude for the exercise of independent judgement and initiative; work is subject to review for conformance with departmental rules and regulations.

SUPERVISION EXERCISED: Supervises the work of a technical and clerical staff assigned to assist.

ILLUSTRATIVE EXAMPLES OF WORK PERFORMED:

To supervise the work of a staff engaged in an industrial hygiene program relating to the identification and evaluation of hazardous exposures to chemical and physical agents, recommendations for and review of hazard control programs and systems, and review of and participation in related training activities; to perform the more complex activities of said program.

To provide technical review, guidance and assistance to professional and technical staff assigned to a particular category of industrial hygiene activity.

To perform the more complex industrial hygiene surveys and inspections for the identification and evaluation of health hazards in the workplace and other indoor environments.

To supervise and perform the collection of air samples and other appropriate samples, and to utilize direct reading chemical monitors, noise dosimeters, radiation detectors and other types of technical equipment to effectively characterize the exposure of individuals to potential health hazards.

To exercise professional judgement in directing the handling of samples and the types of analyses to be performed on samples collected during surveys and inspections; and, to perform the necessary calculations to properly convert analytical results to meaningful exposure measures.

To supervise and perform evaluations utilizing complex technical instruments for the testing of ventilation systems, noise abatement systems, radiation shielding and other measures designed to abate hazards; and, to exercise professional judgement in evaluating the results of this testing for deciding upon the adequacy of control measures.

To exercise professional judgement in deciding whether information collected during inspections and surveys constitute violations of industrial hygiene regulations and standards.

To recommend specific control measures such as training programs, personnel protective equipment, work practice modifications, control ventilation, product substitution and other measures to bring hazardous exposures and conditions within regulatory limits.

To prepare appropriate regulatory correspondence and technical reports based on inspection and survey activities, describing the activities involved, outlining the results of any testing performed, suggesting appropriate abatement measures and requiring a reasonable abatement schedule.

To maintain appropriate records of activities and follow up on violations to insure corrective actions have been taken.

To review for conformance with regulatory requirements complex technical plans and materials submitted by applicants for various licenses to perform hazardous operations; and, to review for adequacy the qualifications of individuals applying for certifications as competent to provide certain industrial hygiene services under state statutes.

To participate in the planning and presentation of training programs related to hazardous materials and operations for the public and for individuals seeking specific certifications to perform industrial hygiene functions under state statutes.

To provide consultation to the public, employers, employees and others on the specific hazards related to various exposures to chemical and physical agents and the methods for controlling such exposures.

To participate in the formulation of regulations addressing industrial hygiene concerns.

As required, to testify before duly constituted bodies regarding the activities which have been supervised or conducted and the professional judgements exercised.

To do related work as required.

REQUIRED QUALIFICATIONS FOR APPOINTMENT:

KNOWLEDGES, SKILLS AND CAPACITIES: A thorough knowledge of industrial hygiene procedures, regulations and standards and the ability to apply such procedures for the evaluation and control of chemical and physical exposure hazards; a familiarity with materials and processes used in industry; the ability to analyze and interpret the results of field and laboratory work; the ability to effectively communicate technically oriented information, both verbally and in writing; the ability to provide technical supervision to subordinates; the ability to establish and maintain working relationships with representatives of industry, various agencies and members of the public; the ability to prepare and present instructional materials related to industrial hygiene topics; and related capacities and abilities.

EDUCATION AND EXPERIENCE:

Education: Such as may have been gained through: graduation from a college of recognized standing supplemented by completion of college courses in chemistry, physics and mathematics; and successful completion of training courses in industrial hygiene related topics offered by recognized colleges or nationally recognized training centers for industrial hygiene; and

Experience: Such as may have been gained through: employment in a responsible technical capacity in the field of industrial hygiene relating to the evaluation and control of chemical and physical agent exposure hazards.

Or, any combination of education and experience that shall be substantially equivalent to the above education and experience.

Class Created: July 7, 1985
