

TITLE OF GROUP OF CLASSES: SUPERVISOR FORENSIC SCIENCES
TITLE OF CLASSES IN GROUP:

	Class Code:
SEROLOGY	02729501
TOXICOLOGY	02729502
DRUG CHEMISTRY	02729503
RACING CHEMISTRY	02729504
	Pay Grade: 34A
	EO: B

CLASS DEFINITION:

GENERAL STATEMENT OF DUTIES: To be responsible for the supervision and operation of a forensic laboratory within the field of specialization indicated by the title of the class of position; and to do related work as required.

SUPERVISION RECEIVED: Works under the general direction of a superior with considerable latitude for the exercise of independent judgement and initiative; work is reviewed through conferences and written reports for conformance to accepted practices and policies.

SUPERVISION EXERCISED: Plans, assigns, coordinates, supervises and reviews the work of technical and other laboratory staff members.

ILLUSTRATIVE EXAMPLES OF WORK PERFORMED:

To be responsible for the supervision and operation of a forensic laboratory within the field of specialization indicated by the title of the class of position:

Serology - the systematic analysis and interpretation of sexual assault evidence including body fluids and stains; blood groupings, species and sex determination, and other forensic serological examinations as required; or,

Toxicology - the analysis of post-mortem biological specimens for drugs and poisons contributing to cause of death; analysis of biological specimens for levels of alcohol and drugs capable of impairing motor vehicle operation; and other forensic toxicological examinations as required; or,

Drug Chemistry - the identification of drugs and chemical contraband in confiscated pills, powders, paraphernalia, pharmaceuticals, foods and beverages and other specimens as required; or,

Racing Chemistry - the examination of specimens obtained from participants in athletic and pari-mutuel events for performance altering substances; the interpretation of findings and other forensic examinations as required.

To evaluate the activity of an assigned laboratory in the area of specialization, as well as the performance of laboratory staff and to submit such evaluations and recommendations to a superior to improve the efficiency and effectiveness of such a laboratory and ensure conformity with applicable state and federal laws, rules and regulations.

To be responsible for conducting quality control programs in support of laboratory evaluations including licensure programs.

To develop and implement an effective personnel training program in the forensic area of specialization.

To plan, direct and/or conduct original research projects in the laboratory relevant to the field of specialization; and, as required, participate in various research projects including those sponsored by the federal government, independent agencies and national health organizations.

To prepare and present scientific papers and lectures.

To prepare periodic and special narrative and statistical reports.

As required, to appear in court or at hearings as an expert witness.

To do related work as required.

REQUIRED QUALIFICATIONS FOR APPOINTMENT:

KNOWLEDGES, SKILLS AND CAPACITIES: A thorough knowledge of the principles and practices of the field of specialization indicated by the title within the group and the ability to apply such knowledge in the supervision and operation of a forensic laboratory engaged in the performance of a wide variety of laboratory analyses; a thorough knowledge of currently accepted laboratory methods and the ability to apply such knowledge in the instruction of laboratory staff, in providing in-service training, and in developing new or improving existing laboratory methods; a working knowledge of all state and federal laws, rules and regulations affecting the operation of work output of forensic laboratory within the assigned field of specialization; the ability to assign, supervise and review the work of a subordinate laboratory staff; the ability to plan, direct and participate in a variety of research activities relevant to the assigned field of specialization; the ability to prepare and present scientific papers and lectures; the ability to analyze and interpret laboratory findings and to present conclusions and recommendations through the submission of narrative and statistical reports to a superior, the medical profession or other laboratories and clinics; the ability to present expert testimony in court or at hearings relative to the field of specialization; and related capacities and abilities.

EDUCATION AND EXPERIENCE:

Education: Such as may have been gained through: possession of a Master's Degree in one of the sciences relative to the field of specialization indicated by the title within the group supplemented by the successful completion of advanced courses of study at the doctorate level in the designated specialty; and

Experience: Such as may have been gained through: employment in a professional forensic laboratory position at a supervisory level involving the responsibility for the supervision and operation of such a laboratory in the field of specialization indicated by the title within the group.

Or, any combination of education and experience that shall be substantially equivalent to the above education and experience.

Class Created: February 28, 1988
